

# WARREN FARM RADIO FLYERS

*With the first break in the weather, Wayne and Richard are straight into the air!*

## NOVEMBER AT WARREN FARM

### THE CIRCUS COMES TO TOWN

We have new neighbours, who will be with us until the middle of January. Zippos Circus are running a winter event in Hyde Park, and are using the old tennis courts for their residential caravans and vehicle storage.

We were initially very concerned that the disruption could interrupt our winter flying. They assured us that they would park their vehicles far enough away, and leave us space for parking several cars, which they have very kindly done.

Having such an upheaval was, of course, very worrying, but we have found them to be lovely people. The only minor issue is that it will not be possible for the Euroloo service truck to gain access to our toilet, however the circus people have offered us the use of their flush toilets.

We hope to remain on friendly terms with them for the next couple of months.

### FIELD CONDITION

The runway was recently mown, however it has already started to grow. It is unlikely that any further mowing will be possible, so models with large wheels (or hand launched) may be preferable in the foreseeable future.

The outfield has now been mown, giving a much clearer landing approach to the runway. The only downside of this is that our warning notice, asking walkers to keep away when we are flying, was run over by the mower and smashed to pieces. We will be trying to find a better solution in the near future.

### RENEWALS

There will be no newsletter in December, instead we will be sending out membership renewal reminders. There will be a small increase in our subscription, as the very generous discount on our licence fee has been reduced. This will be the first increase in our subscriptions since 2012.
