

# WARREN FARM RADIO FLYERS

*Unexpected visitors at the field – vandals had to set fire to one of the old changing rooms*

## FEBRUARY AT WARREN FARM

### MAJOR CHANGES IN THE PIPELINE?

We recently had a call from a company involved with aerial photography, asking if they could use our facilities for professional drone training and equipment testing. They are now discussing this with Ealing Council.

As far as we know, their activities would take place “several times a month”, although they have not specified how often this would be, nor where they will be setting up their base or which part of the site they would be overflying.

We urgently need to know how many club members would be happy to share the site with this company, how many would not be happy for such an arrangement, and how many are undecided, so that we can advise LBE on our views.

**Please email Bob Howard and Paul Perkins by no later than 6pm Wednesday so that we can collate the information to present to Ealing Council.**

### ZIPPOS CIRCUS

The circus has now vacated the tarmac area, and have left the site in good condition. We found them to be lovely neighbours, and we hope to welcome them back later in the year.

### FIELD CONDITION

The runway has not yet become too overgrown although as spring draws near models with larger wheels may become the order of the day until the first mow of the year, which usually takes place in April.

### VANDALISM AGAIN

As Tom Thomas was leaving the field a few days ago, he spotted smoke & flames coming from the changing room close to where we used to park. He called the fire brigade, opened the gates for them and stood clear whilst the fire was extinguished.

One of the firefighters suggested that it was probably started intentionally by youths, several groups of whom were scattered around the site.

Many thanks to Tom for dealing with the situation.
