

# WARREN FARM RADIO FLYERS **WFRF**

*A good display of models at Norwood Green Village Day.*

## **AUGUST AT WARREN FARM**

### **FIELD CONDITION**

The runway is still in excellent condition, however we regret to report that part of the outfield has been damaged by fire. We understand that this was caused by a walker dropping a cigarette end from the pathway leading from our patch to "Cap Corner", the small copse of trees in the eastern edge of the field. Please take care to avoid any such incidents arising from our presence there.

### **VILLAGE DAY**

We had a very small turnout of members to help at Village Day (just Paul Perkins and your editor), but our numbers were swelled by Sean and Paul from the Northwick Park club, who have both shown an interest in our flying site. Many thanks to both of them for all the help they gave. We hope to see them at our field very soon.

We were visited during the day by the new local Councillors John Martin and Dr. Ghulam Murtaza, whom we expect to visit us at Warren Farm the near future. We hope that they will be able to support us in our endeavours.

We were also visited by several budding new and returning members, so our ranks may well increase in due course.

We also distributed our many leaflets detailing both the activities of our club, and of the Warren Farm Nature Reserve Group. It may be coincidence, but since the leaflets were handed out at the show there has been a significant increase in the number of people signing the WFNR Petition. Copies of the leaflet are attached.

### **AND FINALLY**

A former club member is having a cull of his fleet of models, and would like to give some of them away rather than take them to the dump. When we have a full list of the models available, we will let you know, and possibly arrange for them to be viewed at the field.
