

WARREN FARM RADIO FLYERS

New members Jay and Romao display some of there fleet of models .

APRIL AT WARREN FARM

FIELD CONDITION

The grass has now been mown! Many thanks to John at Greener Ealing for arranging this as soon as the rain held off for a few days.

As the grass was so long, only the rotary mower was able to cope with it, but it has still produced an adequate take-off & landing area. The cylinder mower will return as soon as the conditions permit.

GREAT NEWS

We are happy to welcome two new members to the club. Both are Ealing residents, and are experienced model flyers.

Jeiram “Jay” Jeyaraynam has been seeking a local club for some time, but was unaware of our presence at Warren Farm. His fleet includes a Piper Cub, a “Rare Bear” (based on the famous Grumman Bearcat racer), and a small EDF model. He also flies some of the tiny electric models, similar to those often flown by Tom Thomas.

Jurandir Romao, known simply as “Romao” has also been seeking a local club, and was introduced to WFRF by Jay. He holds a Private Pilots Licence, and hopes to be able to transfer his native Brazilian commercial pilots licence to a UK licence in due course.

We wish them both well with the club, and hope to see them in action at the field as often as possible.

NORWOOD GREEN VILLAGE DAY

We are still awaiting news of the date for Norwood Green Village Day. If you expect to be able to help, please let us know ASAP.

AND FINALLY

New member Jay has been introducing Luca to the joys of miniature model flying. Despite his tender years, and with little stick time to date, Luca has been flying these difficult models with great skill and aplomb.

No doubt in a few years time he will be showing us all how to do it!
