

WARREN FARM RADIO FLYERS **WFRF**

Wayne Stephenson has been entertaining us with this Nieuport 17 from the much missed Flair Models range.

NOVEMBER AT WARREN FARM

FINAL NEWSLETTER OF THE YEAR

As usual, there will be no newsletter in December, instead you will receive the annual membership renewal reminder.

Ealing Council have advised that they will not be increasing the licence fee this year, so we are able to maintain club subscriptions at £40 for one more year, however in order to remain solvent we will need to attract new members to swell the ranks. Details of our club are being circulated to local model shops, and we are looking at other ways of spreading the word that, despite all the trials and tribulations following the threats to our existence since the 2012 proposal for QPR takeover of the site, we are still alive and kicking, and have one of the best flying sites in the area at a very reasonable cost.

We may need your help in the coming months to raise the profile of the club.

FIELD CONDITION

The runway was recently mown, and is in good shape. We hope that the grass will not grow too much before mowing recommences in March!

VANDALISM & THE TOILET

Following the recent attacks on our toilet, it has now been removed from site. We understand that Euroloo will be contacting the police, who have so far not been able or willing to carry out an investigation following our full report.

This is clearly not simple vandalism, as the heavy chain used to secure the toilet to a tree was cut with heavy duty bolt cutters, not an implement which the average vandal would be likely to carry.

The toilet will not be replaced unless we can find some way of providing a secure compound to safeguard against further attacks.
