

# **WARREN FARM RADIO FLYERS**

**This is the November 2025 Newsletter.**

**With the flying season coming to an end, this would normally be a very brief Newsletter. However, a couple of items have cropped up which need some attention. These are:**

## **RCC Tests**

**You will have seen in the latest copy of BMFA News that all members must pass the on-line RCC test by the end of November to fly legally. Some members (like me!) will have been given their RCC certificate based on passing the Fixed Wing A certificate. This RCC is provisional and only valid until the end of November, so you must take the on-line test. If you have problems getting on-line, you are welcome to come round to my place and do the test here. It is not difficult, and you will learn something while doing it!**

## **Bob's Planes and Equipment**

**Richard, Ken and I went round to visit Bob's widow, Anne, and move some of his equipment to my garage. There is a lot of it. I attach a couple of pics. If you see anything you want, let me know. I will circulate a full inventory next week. Prices will be very competitive! Come round to inspect anything that interests you! It will be quite a big job to dispose of everything, so let me know if you want to help in any way.**

## **Other Business**

**The landing strip is still in great condition, and we have managed some good flying.**

**Some members have already paid BMFA fees directly to the BMFA. This has proved very straightforward to complete. The club subscription is not due until the end of the year. Ideally, this will be paid directly into the WFRF account. Let me or Richard know if this will be a problem for anybody.**

**Below are a couple of photos of Bob's equipment and some links to taking the RCC Test, getting a Flyer ID and registering additional data.**

**Paul**

**Prepare for the theory test:**
